

Bizol CVT Drive

BIZOL CVT Drive is a full synthetic high-performance automatic transmission fluid developed specially for the latest generation of CVT gear boxes. Selected base oils and a well adjusted additive package protect against foam formation, which is very important in CVT gear boxes. This product has excellent anti-aging and anti-oxidation characteristics.

PROPERTIES

- ◆ High shear stability
- ◆ Excellent protection against foam formation
- ◆ Very good anti-aging and anti-oxidation characteristics
- ◆ Reliable lubrication even under low temperatures
- ◆ Advanced protection against wear and corrosion

NOT SUITABLE FOR HYBRID CVT

TECHNICAL DATA

Density at 15°C, kg/m ³	848
Viscosity at -40°C, mPa.s	<12 000
Viscosity at 40°C, mm ² /s	34
Viscosity at 100°C, mm ² /s	7
Viscosity Index	173
Flash Point, °C	210
Pour Point, °C	-52
Colour	Yellowish

FIELD OF APPLICATION

BIZOL CVT Drive was approved for use in Autotronic gear boxes installed at Mercedes A and B classes. It is also applicable to many variable automatic transmissions of different manufacturers, among others to Audi Multitronic.

INSTRUCTIONS

Follow the operation instruction of the vehicle and engine manufacturers.
